

As one of the Genghis Khan MTB Adventure's main sponsors, Wilderness Trail Bikes (WTB) is providing several of its newest Frequency rims as prize for top performers during the 3-day event. As WTB's promotional PDF says: Frequency rims are a simple solution to get the best tubeless wheel build available at an affordable price. With CID (Compatible Integrated Design) Design Principles, any qualified wheel builder can build up Frequency rims with standard wheel building tools and parts to make a wheel that's easy to service in the field.

Technical wizards and all mountainbike enthusiasts are invited to have a look at the clear and informative PDF files regarding the specifications of the WTB [Frequency rims](#) , as well as at the [FAQ sheet](#) .

WTB is a California-based American company that specializes in mountainbike components. As sponsor of the 2012 Genghis Khan MTB Adventure, several of its high-end products will be highlighted before and during the event. The strongest bikers will receive quality prizes, but a few of the products will also be handed out via the lucky draw - so everyone has a chance to score WTB. Furthermore, all participants in the Genghis Khan MTB Adventure will find two WTB handlebar grips in their race participant's bag!

Please visit the [website](#) of Wilderness Trail Bikes for more information on the company and its wide range of products.
